Industrial Survey

Published in 1997

## PREFACE

The Department of Census and Statistics continues to conduct the Annual Survey of Industries (ASI), which commenced in 1984, replacing the Annual Survey of Manufacturing Industries and covers all activities categorized under the three industrial divisions, namely Mining and Quarrying, Manufacturing and Distribution of Electricity, Gas & Water.

This is the preliminary report which gives the selected Industrial Indicators pertaining only to the reported establishments in 1993, for which the reference year was 1992. The final report which will provide estimates in respect of all the establishments which have been included in the register of industrial establishments will be published soon.

Information in this report is not adjusted for non-responding establishments, and only the data of sampled establishments have been considered in compiling these indicators. As such, data users are requested to have this in mind while interpreting the indicators of this report.

Any suggestion to improve this survey and the report is most welcome.

This consists of all finished goods made by the establishment using their own raw materials and manufactured by another establishment using raw materials owned by this establishment and ready for release. Finished goods held by the establishment which were made from materials owned by others have been excluded. Valuation is in producer's prices.

**c. Receipts from industrial services**

The total value of receipts from

- i. Contract and Commission work done for others on materials owned by them
- ii. Repairs and installation work done for others
- iii. Sales of scraps and refuses
- iv. Own account investment work are considered here

The value of output was obtained from the value of shipments and other receipts of Industrial Services adjusted for changes in the values of stocks of finished goods during the reference period.

$$\begin{aligned} \text{Value of Output} = & \text{ [Value of products moved out]} \\ & + \text{ [Closing stocks of finished goods]} \\ & - \text{ [Opening stocks of finished goods]} \\ & + \text{ [Receipts from Industrial Services]} \end{aligned}$$

**5.2 INPUT COSTS**

Information on inputs has been collected covering the costs of

- a. Raw materials and packing materials (Imported and Indigenous) consumed,
- b. Industrial services done by others for the establishment,
- c. Fuel, Electricity & Water consumed.

**a. Cost of raw materials, packing materials**

**I. Cost of raw materials, packing materials purchased**

All material inputs (Raw materials, parts, components containers and supplies) purchased by the establishment for the production process either in this establishment or in another establishment have been included. All materials have been valued at purchaser's prices.

- i.e. the delivered value at the establishment including the purchaser's price, transport charges, cost of insurance, all taxes and duties on the goods. Discounts or rebates allowed to the purchaser and the value of packing materials returned to the supplier have been deducted.

The value of materials owned by others and received by the establishment for production process have been excluded and material inputs received by the establishment from other establishments of the same enterprise (not purchased) for processing have been valued as if purchased.

ii. Values of stocks of raw materials and packing materials etc.

The opening and closing stocks of all input materials (imported and indigenous) including packing materials which are purchased (or treated as purchased) have been included.

The stocks of raw material used for own account work for producing own fixed assets have been excluded.

b. Cost of industrial services

The total cost of

- i. Contract and commission work done by others on materials supplied by the establishments and
- ii. Repairs and maintenance services provided by others are included.

Raw materials consumed has been computed by adjusting stocks of raw materials to the total value of raw materials (imported and indigenous) and packing materials purchased.

Raw materials and packing materials consumed

$$\begin{aligned} &= [\text{Raw materials and packing materials purchased} \\ &\quad (\text{Imported} + \text{Indigenous}) \\ &+ [\text{Opening stocks of materials}] \\ &- [\text{Closing stocks of materials}] \end{aligned}$$

c. Fuel, electricity and water consumed

The total of the values of Fuel (LPG, Coal and Charcoal, Petrol, Diesel Oil, Furnace Oil, Kerosene Oil, Firewood and others) Electricity and Water consumed has been included.

The total value of raw materials consumed, cost of industrial services and Fuel, Electricity and Water consumed have been defined as the value of Inputs.

### 5.3 FIXED CAPITAL ASSETS

The book value at the beginning of the year, value of gross additions during the year and depreciation of all assets with productive life of one year or more, owned by the establishment (i.e Land, Buildings, other constructions and Land Improvements, Machinery and other equipment, Transport equipment) have been collected. Leased or rented assets have not been included.

a. **Book value at the beginning of the year**

This refers to the original cost price of the item less its depreciation, less assets retired and sold upto the beginning of the year.

b. **Gross additions to fixed assets during the year**

This is defined as the total of the costs of new and second hand fixed assets acquired during the year and alternations, renovations and improvements purchased, cost of own account work less the value of sales of fixed assets.
