## PREFACE

The first survey of Construction Industry was conducted in 1993 with the assistance of Institute for Construction Training and Development (ICTAD). Thereafter the Department continues to conduct the survey annually to cater the needs of National Planners and other data users.

This publication provides the results of 1997 survey on which the reference period was 1996. The frame for this survey was the list of contractors registered with ICTAD and Local Authorities. The list of plan approvals ( building permit issued ) of the local authorities in the year 1996 are also included.

Any suggestion to improve this survey and report is most welcome.

## ACKNOWLEDGEMENT

The planning, collection and processing of data and the preparation of this report were done by the staff of the Industry and Construction Division under the guidance of Mr. D.J.C.S. Jayalath, Deputy Director and under the direction of Mrs. A.B.S. Fernando, Statistician with the assistance of Mr. D.S.S. Gunawardana, Statistical Officer.

Computer Data Processing was done by Mr. W.F.M.J. Fernando Statistical Officer using the Software Package Dbase III+ and the statistical tables were obtained by Mr. R.D.N. Premawansa, Statistical Investigator using the software package SPSS/PC+. Editing and coding of data was done by Miss K. A. P. Deepanie, Statistical Investigators under the direct supervision of Mr. D. S. S. Gunawardana, Statistical Officer.

Data collection of the follow up stage was done by the statistical investigators attached to the divisional secretariats and the Industry and Construction Division of the Department under the supervision of District Statisticians/Statistical Officers and Staff officers of the Industry and Construction Division, respectively.

Preparation of the publication was done by Mr. D.S.S. Gunawardana, Statistical Officer using the Apple Macintosh system.

Acknowledgements are also due to Mr. K.D. Siripala, Deputy Director and his staff for printing this report within a short period.

The publication of this report and conducting of the survey were done under the overall guidance of Mrs. Suranjana Vidyaratna, Director (Statistics) 2.

The co-operation given by the respondents is also much appreciated.

## Survey of Construction Industry - Sri Lanka 1997

### 1. Introduction

Survey of Construction Industry was conducted in 1993 for the first time in Sri Lanka mainly to furnish data regarding input, output and their trends to the Institute for Construction Training and Development (ICTAD). The Department of Census and Statistics continues to conduct the survey annually to cater the requirements of the data users along with the rapid development of the construction industry in Sri Lanka.

### 2. Scope and Coverage

In this survey, all construction activities undertaken by the contractors registered with ICTAD and Local Authorities are covered. The plan approvals for building construction (building permit issued) of the local authorities in the year 1996 are also covered. Therefore the construction activities undertaken by other contractors and informal construction activities are excluded from this survey.

Information is collected relating to the following sectors of the construction industry.

- i. Building construction
- ii. Highway construction
- iii. Bridge construction
- iv. Water supply & water work
- v. Irrigation & canal development
- vi. Reclamation of low lying areas
- vii. Other construction

Above construction activities are categorized under Civil Engineering activities except building construction.

### 3 Methodology

The questionnaire was posted to selected contractors in order to collect information such as, value of contract, value of work done, expenditure for work done during the year and employment by activity and by sector.

Field follow up for non responding contractors was done by using the trained Statistical Investigators attached to respective Divisional Secretary Divisions and Industry & Construction Division under the supervision of Statisticians and Statistical Officers in Colombo and Districts.

#### 4. Frame

List of contractors registered with the ICTAD which was used as the frame for the Survey of Construction Industry - 1993, has been used as the frame for this year 1996 after revising as at 30th June 1996. As this frame seemed to be incomplete, the contractors registered with the Provincial Councils and the list of plan approvals of the local authorities were also added to the ICTAD list of contractors.

#### 5. Sample Design

Stratified systematic sampling method was used for the survey and the list of contractors registered with the ICTAD was divided into 6 strata according to the grading system of ICTAD considering the Financial terms. Contractors categorized under grade 1 to grade 4 were 100% canvassed and a probability sample was selected from other contractors and building permit holders as mentioned below.

Sample Frame	1996 Sample fraction	Sample Size
1. List of contractors registered with ICTAD (as at June 1996)	100%	371
2. List of plan approvals of Local Authorities in 1996	10%	864
3. List of contractors registered with Local Authorities in 1996	40%	699
Total		----- 1934 ===

#### 6. Concepts & Definitions

##### a) Reference Period

Data relating to construction activities carried out during the calendar year 1996 or financial year 1996/97.

##### b) Number of Persons Engaged

This refers to the average number of persons engaged during the reference period, including working proprietors, active business partners, unpaid family workers and other paid workers.

##### c) Salaries & Wages

Amount paid as salaries, wages or subcontract on work done during the period.

- d) **Output**  
Value of work done during the year
- e) **Input**  
Expenditure on goods & services = goods + services + other expenses.
- f) **Value Added**  
Value added the increment to the value of commodities and services that is contributed by the contractor. It is computed as follows.
- Output - Input = Value added.

## 7. Survey Results

The Survey of Construction Activities does not cover all construction activities carried out during the reference period in the island. The survey covers building construction activities carried out within MCC, UCC and some selected rural areas with the approval of the local authority concerned on one hand and all the construction activities carried out by the contractors registered with ICTAD as well as the Local Authorities

Therefore it is clear that;

- a. The construction activities other than carried out by the ICTAD and Local Authority registered contractors such as construction of houses in the rural sector,
- b. The construction activities carried out in the urban sector without the approval of the local authority,
- c. Large scale construction activities carried out by international contractors, are not covered by this survey.

It should also be noted that there may be a duplication of the building construction activities if an ICTAD registered contractor has built a house in an urban area where plan approval is compulsory.

When the building construction activities of the plan approvals of the urban sector are concerned it is seen that the highest output or the value of work done, amounting to almost 648 million rupees is recorded for two storey houses leaving the one storey houses in the second position with 581 million rupees out of a total of 1,486 million rupees. Among the expenditure on building construction the labour component is the highest, been 435 million rupees and the cement which is about 225 million rupees is the next highest.

In case of contractors, the value of buildings other than houses is 663 million rupees contrast to the 157 million rupees recorded for plan approvals. The reason may be most of these constructions are either for the public sector or located in rural areas and therefore the plan approvals may not have been obtained. The total value of the construction work done by the contractors is about 1.9 billion rupees and the highest is the construction of buildings being a value of 737 million rupees.
